EXCEEDS 6 STAR ENERGY RATINGS

UPVC Windows +

Multi chambered UPVC windows made with the highest grade European materials are maintenance free, never require painting, will never rot or corrode. They Come in various colours to suit any decor or colour scheme.

Noise Reduction +

Double glazing on all our product not only helps keep the Heat in and the Cold out but it can also reduce sound transmission by up to 80%.

Thermally Efficient +

Thermally efficient, High performance windows and doors made from environmentally friendly UPVC, that will keep you warmer in Winter and cooler in Summer.

“Well this is our first winter with Nu-Eco windows and we are very pleased with it. Our heating bill is gone down and noise level is down too. Installer were one of the most professional that I have ever work with and I would recommend to everyone. Once more I like to thank Russell and his Team.”

Zoran Tubakovic

Nu-Eco Windows are made in the U.K. where our fabrication team utilising 25 years experience in manufacturing UPVC windows with state of the art machinery ensure that you receive a premium quality product. All joins are fully welded, frames are steel reinforced, European locking systems ensure that your Home is sound and secure and a 28mm sealed Double glazed unit, largest in its class provide insulation for heat, cold and sound. At Nu-eco we can help you ensure an efficient operating household with our quality range of energy efficient, cost effective Double Glazing solutions. We can create a positive and sustainable atmosphere, cutting carbon emissions by reducing your heating and cooling bills with our eco friendly double glazing windows.

PROFESSIONAL INSTALLATION

All installations are guaranteed, as a Registered Building Practitioner we meet the legal requirement to carry out domestic building works over \$5000 and you can be confident that we have the right qualifications, knowledge, experience and domestic building insurance (Where works exceed \$12,000).

THERMALLY EFFICIENT

We are able to achieve U-Values down to 1.2 W/m²k by utilising special glass, Argon gas and Thermal inserts in place of steel reinforcing. Our standard windows easily achieve ratings down to 1.8 W/m²k.

DOUBLE GLAZING

Our double glazed units are manufactured in Australia to Australian Standard and guaranteed for 10 years for the integrity of the sealed unit. Argon gas and Low E glass options provide better thermal and noise performance, speak with one of our qualified staff to find out what is best for your project.

SECURE BY DESIGN

Multi point locking and Secure by Design accreditation provides you with one of the most secure windows products on the market. For security reasons all our windows

are internally glazed to prevent break-ins by removing glass.

LOW MAINTENANCE

Other than a general clean each season there is no maintenance on our products. No need for painting, will never rot and never corrode unlike Timber or Aluminium Windows.

EXCEEDS STANDARDS

Our windows and doors have been extensively tested in the U.K. and exceed the requirements of Australian Standard AS2047. More information can be provided on request.

COMMITTED TO EXCELLENCE ON EVERY PROJECT

Our testimonials shown on our website are directly taken from those listed on Google + by our customers.

The testimonials can be views on our website or Google + and are a clear testament to the quality and service you would expect from a professional window replacement company. We are committed to making sure that every customer is not only satisfied with the products and services but also the performance of the Windows.

CHOOSE ECO FRIENDLY DOUBLE GLAZING FOR YOUR HOME

Our windows are available in the colours shown below. Note that both the white and Cream colours are solid colours that go right through the profile. Our timber look and other colours are veneered with a purpose designed foil that is adhered to the profile directly by the supplier of the profile. Note that all foils are only guaranteed for 5 years by the manufacturer.
